(54) IMAGE SYNTHESIZER

(57)Abstract:

PROBLEM TO BE SOLVED: To provide such a video as approach to a peripheral three-dimensional object can be analogized easily by displaying a video converted as if it is photographed at a virtual point of view on a monitor while superposing an auxiliary video.

SOLUTION: The image synthesizer comprises an image pickup means 101 mounted on a vehicle, means 102 for synthesizing an image picked up by the image pickup means 101 while converting the point of view, means 103 for generating the locus line at an arbitrary height of the vehicle when it advances straight, and means 104 for describing the locus line generated by the locus line generating means 103.

## LEGAL STATUS

[Date of request for examination] 15.02.2002

[Date of sending the examiner's decision of rejection]

[Kind of final disposal of application other than the examiner's decision of rejection or application converted registration]

[Date of final disposal for application]

[Patent number] 3645196
